Ashtray for motor vehicles

AB - (A3)

An ashtray 1 for motor vehicles consists of an element made from plastic 2 comprising a case 3 which is open on one face 4 and intended to be mounted in a corresponding housing inside the passenger compartment of the vehicle, and a flap lid 6 obtained by moulding, in a single piece, at the same time as the case 3, and assembled to the case 3 at its lower part, by a thin film hinge. The flap lid 6 carries, on its face turned towards the inside of the case 3, two lateral flanges 9 each of which has a curved slot 10 in which two fixed studs 11 carried by the case 3 are engaged. The ashtray comprises an internal auxiliary box 13, removably assembled to the internal face of the flap lid 6. <IMAGE>

AB - FR2589111 The cigarette ashtray for a motor vehicle consists of a plastic box (3) with an opening lid (6) on one face, which can be moulded in one piece with thin strap hinges along its lower edge.

- The box fits into a recess in the vehicle by means of spring clips, while the closing and opening of the lid is controlled by curved slots (10) in two brackets (9) at the sides of the lid engaging with a pair of projections. The box contains an inner casing, made from metal or a self-extinguishing plastics which fits onto the inside of the lid by clips (14,15) and can be removed for emptying.

- ADVANTAGE - Design and fitting simplicity. (/4)
